UNTILTED x TOPSTEPX

TOPSTEP USERS: SAVE $14.50 USD

Get a $14.50 USD discount on Untilted when you sign up and connect using the Topstep API.

Connect your TopstepX account

Get an API key, then add it in Untilted. Follow these steps in order.

Before you start: You need an active Topstep account (such as an ongoing Trading Combine). API access is a separate paid ProjectX subscription.

1 Create your ProjectX Dashboard account

Go to dashboard.projectx.com and choose Register if you are new. This is separate from the regular Topstep Dashboard.

2 Pay for ProjectX API Access

In the ProjectX Dashboard, open Subscriptions in the left menu and choose ProjectX API Access. This is a paid subscription. At checkout, use code topstep for 50% off.

3 Link ProjectX to TopstepX

Go to topstepx.com and open Settings → API. Under ProjectX Linking, click Add Link and confirm. Check that your TopstepX account appears in the ProjectX Dashboard.

4 Create and copy your API key

Back in TopstepX → Settings → API, click Add API Key. Copy the key and keep it private.

Seeing “User lacks subscription”? Complete the ProjectX link in step 3, refresh, then try Add API Key again.

FINISH IN UNTILTED

Sign in, open Connections → TopstepX, and enter your TopstepX username and ProjectX API key. Enter an Account ID to choose a specific account; you can leave it blank if you have one active account. Click Connect TopstepX.

The enable checkbox allows Lab orders and hard-stop closing on a verified simulated account. Select it only if you want those actions.
